Great Skin Starts with An Appointment

- Dr. Naomi Dolly

Dr. Naomi Dolly
MD, FAAD

Dr. Naomi Dolly's successful completion of Medical School, with multiple distinctions and honours, led to the strong foundation in starting her residency in dermatology in SUNY Downstate Medical Centre, New York.

She has also completed fellowships at NYU Medical Centre in advanced medical dermatology and dermatopathology at the Ackerman Academy of Dermatopathology, New York. Dr. Dolly holds board

certifications in dermatology as well as dermatopathology with the American Board of Dermatology.

Dr. Dolly takes pride in her patients' satisfaction and through her time, care, honesty, and offering of cutting edge techniques and technologies she achieves the best results with them. She also believes that restoring your health and a youthful image is done by intensifying your natural beauty, and not by altering your unique features.

ABOUT US

ReTouched by ND is pleased to announce that we are now a registered Centre of Excellence for Candela Corp. "The Candela Centre of Excellence" is the only one of its kind in the Caribbean and is a leading US-based global device company that specialises in medical-aesthetic applications including women's health treatments, pigmented lesions, scars, wrinkle reduction, body shaping etc. There are other branches worldwide, however Retouched by ND will be the first in Trinidad and Tobago and the Caribbean to offer these services.

We will provide more services for clients and will also train and apprentice new dermatological practitioners in the field equipped with laser related skills and otherwise. We provide medical and aesthetic services using non-invasive advanced technologies/techniques to improve the skin's overall health and feel.

Our approach is professional with specialized service offerings, set in a welcoming and relaxing environment. Candela's brand values of science, results and trust is synonymous with Retouched by ND as we set a high level of service ensuring our patients receive the utmost standard in quality care. We are proud and honoured to be associated with Candela Corp.

David J. Pataca, MSL, LSO
Executive Regional Director – Florida &
The Caribbean with the Candela Team

You can't treat your skin like a flip flop, and expect it to look like Louboutin...

MAY Cancer Awareness Month

May is the Month for Skin Cancer.....Here's some famous people that you may know that have had some form of skin cancer.

It is more prevalent than you think huh? Did you know that one bad burn in childhood doubles the risk factor for melanoma later in life, and also men are diagnosed with skin cancer more often than women!?

ReTouched by ND LAUNCH EVENT

It was only exactly one year ago on May 16th at ReTouched by ND, the VelaShape III and UltraShape Power service machines for body shaping and contouring were unveiled. Guests—mainly women—were introduced to this breakthrough technology that reduces stubborn fat in problem areas for a more slender, sculpted figure. Speaking at the launch, ReTouched founder Dr Naomi Dolly introduced and explained about the clinic and technicality of the machines that can address the entirety of the body. Ms Victoria Worship, territory representative of Candela Medical (then Syneron-Candela) was also represented to present the first combination treatment for fat reduction and loose skin in the southern Caribbean. At the prestigious launch, guests were given tours of the clinic and live demonstrations on body contouring and shaping, and were able to interact with medical experts.

OUR SERVICES

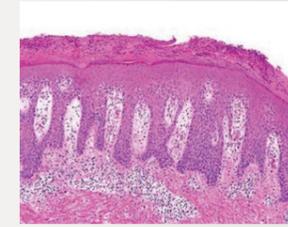

Aesthetic Dermatology

Approved procedures employing the latest advancements in aesthetic treatments we can improve your appearance, and bring that youthful glow back.

Medical Dermatology Services

Medical dermatology involves the evaluation and diagnosis for diseases of the skin, hair, and nails. ReTouched by ND administers a wide range of treatments to control, or cure, skin related issues.

Dermatopathology Services

This recently added service is steadily gaining importance for physicians and dermatologists who require diagnoses not obvious on simple examination with the eyes. Samples are taken from the skin for microscopic

observation in order to evaluate and diagnose skin diseases for patients. This new service offered will contribute to the accuracy of diagnosing patients. Being a dermatologist and dermatopathologist, allows for clinicopathological correlation in those difficult case scenarios.

WHAT'S NEW

Newly Added Services

In our cultural environment, our face and body image is becoming more and more important. Though we often think about our appearance as being our faces only, one study concluded that as many as seven in ten women (70 percent) admit they are more worried about developing a tummy bulge now and in the future as opposed to the 66 percent who are concerned with wrinkles and/or fine lines.

Following the launch of last year's machines i.e. the VelaShape III as well as the Ultrashape Power for body shaping and contouring. We have now added 3 new laser machines to the line-up i.e. the CO2RE to assist with skin resurfacing, acne and scars, skin rejuvenation and women's intimate issues of dryness and incontinence. The Vbeam Perfecta for vascular lesions and finally the GMax Pro the "work horse" for hair removal.
